Dream Achieve Moments (Second Draft) — market size ·

Sales draft 2026-10-24 16:00 · every number carries its source; est. = hypothesis (our arithmetic on official counts). Person cou

A · TAM → SAM → SOM → first market

Nested headcounts, linear scale. Hover a bar for the source.

TAM = workers in BLS "Very high" AI-exposure occupations (BLS, 2026 — exposure ≠ job loss). SAM = BLS 2025–35 declining/flat occupations where BLS names AI or automation (est.). SOM = SAM filtered to age 25–44 and median pay ≥ $45k (est.). Beachhead = 5 creative/language occupations, US+CA official counts (BLS 2025 · Job Bank 2023). First market = US writers & authors (BLS 2025; 65% self-employed).

C · Revenue model — B2C proves it, B2B pays for it

Three revenue lines plus the opt-in data-credit loop. Prices are hypotheses until tested.

D · US g

PHASE	W A
0–3 mo 1st market	U w e A r/ S c cl
3–9 mo 2nd	T d

Why this order: ① acquires, ② covers server cost, ③ is the main revenue (the brain is the product, tokens are the meter), ④/⑤ is optional upside and must pass CCPA "sale/share" + financial-incentive notice rules (CA Civ. Code §1798.140, §1798.125) — raw data never leaves the device; we sell inference and aggregates, not people's data. Datacoup (2012–2019) shows raw-data brokerage alone does not pay.
